The Cambridge Yearbook of European Legal Studies provides a forum for the scrutiny of significant issues in EU Law, the law of the European Convention on Human Rights, and Comparative Law with a 'European' dimension, and particularly those issues which have come to the fore during the year preceding publication. The contributions appearing in the collection are commissioned by the Centre for European Legal Studies (CELS) Cambridge, a research centre in the Law Faculty of the University of Cambridge specialising in European legal issues. The papers presented are at the cutting edge of the fields which they address, and reflect the views of recognised experts drawn from the University world, legal practice, and the institutions of both the EU and its Member States. Inclusion of the comparative dimension brings a fresh perspective to the study of European law, and highlights the effects of globalisation of the law more generally, and the resulting cross fertilisation of norms and ideas that has occurred among previously sovereign and separate legal orders. The Cambridge Yearbook of European Legal Studies is an

The past decade has seen the medium of comics reach unprecedented heights of critical acclaim and commercial success. Comics & Media reflects that, bringing together an amazing array of contributors--creators and critics alike--to discuss the

state, future, and potential of the medium. Loaded with full-color reproductions of work by such legends as R. Crumb, Art Spiegelman, Alison Bechdel, Chris Ware, Daniel Clowes, and Lynda Barry, the book addresses the place of comics in both a contemporary and historical context. Essays by such high-profile figures as Tom Gunning, N. Katherine Hayles, Patrick Jagoda, and W. J. T. Mitchell address a stunning range of topics, including the place of comics in the history of aesthetics, changes to popular art forms, digital humanities, and ongoing tensions between new and old media. The result is a substantial step forward for our understanding of what comics are and can be, and the growing place they hold in our culture.

Discourse is language as it occurs, in any form or context, beyond the speech act. It may be written or spoken, monological or dialogical, but there is always a communicative aim or purpose. The present volume provides systematic orientation in the vast field of studying discourse from a pragmatic perspective. It first gives an overview of a range of approaches developed for the analysis of discourse, including, among others, conversation analysis, systemic-functional analysis, genre analysis, critical discourse analysis, corpus-driven approaches and multimodal analysis. The focus is furthermore on functional units in discourse, such as discourse markers, moves, speech act sequences, discourse phases and silence. The final section of the volume examines discourse types and domains, providing a taxonomy of discourse types and focusing on a range of discourse domains, e.g. classroom discourse, medical discourse, legal discourse, electronic discourse. Each

article surveys the current state of the art of the respective topic area while also presenting new research findings.
