This book articulates a bold, new, systematic theory of psychology, culture, and their interrelation. It explains how macro cultural factors -- social institutions, cultural artifacts, and cultural concepts -- are the cornerstones of society and how they form the origins and characteristics of psychological phenomena. This theory is used to explain the diversity of psychological phenomena such as emotions, self, intelligence, sexuality, memory, reasoning, perception, developmental processes, and mental illness. Ratner draws upon Lev Vygotsky's sociocultural psychology, Bronfenbrenner's ecological psychology, as well as work in sociology, anthropology, history, and geography, to explore the political implications and assumptions of psychological theories regarding social policy and reform. The theory outlined here addresses current theoretical and political issues such as agency, realism, objectivity, subjectivism, structuralism, postmodernism, and multiculturalism. In this sense, the book articulates a systematic political philosophy of mind to examine numerous approaches to psychology, including indigenous

psychology, cross-cultural psychology, activity theory, discourse analysis, mainstream psychology, and evolutionary psychology.

This title was first published in 1976. This book provides both an explanation of the inflation which has bedeviled economic policy in the West since the end of World War II and a micro-economic theory to purge Keynesian models of the Walrasian strain derived from Marshall's Principles. By focusing on what is taken to be the representative business firm of the twentieth century - the large corporation or megacorp - the microeconomic model presented in the book reverses the usual assumptions of economic analysis. Instead of assuming the existence of firms with no control over prices, the book examines how the megacorp uses its pricing power to finance its own internal rate of growth. The result is a determinant model of how prices are set under the sort of oligopolistic conditions which prevail in most modern industries throughout the world.

Reconstruction is one of the most complex, overlooked, and misunderstood periods of American history. The thirteen essays in this volume address the multiple struggles to make good on President Abraham Lincoln's promise of a "new birth of freedom" in the years following the Civil War, as well as the counter-efforts including historiographical ones—to undermine those struggles. The forms these struggles took varied enormously, extended geographically beyond the former Confederacy, influenced political and racial thought internationally, and remain open to contestation even today. The fight to establish and maintain meaningful freedoms for America's Black population led to the apparently concrete and permanent legal form of the three key Reconstruction Amendments to the U.S. Constitution, as well as the revised state constitutions, but almost all of the latter were overturned by the end of the century, and even the former are not necessarily out of jeopardy. And it was not just the formerly enslaved who were gaining and losing freedoms. Struggles over freedom, citizenship, and rights can be seen in a variety of venues. At times, gaining one freedom might endanger another. How we remember Reconstruction and what we do with that memory continues to influence politics, especially the politics of race, in the contemporary United States. Offering analysis of educational and professional expansion, legal history, armed resistance, the fate of Black soldiers, international diplomacy post-1865 and much more, the essays collected here draw attention to some of the vital achievements of the Reconstruction period while reminding us that freedoms can be won, but they can also be lost.

textbook it's perfect for macro methods and community organizing courses. It's packed filled with wisdom, insight, and experience, all delivered with grace, clarity, and commitment. -Robert Fisher, University of Connecticut □ Steve Burghardt makes macro practice and community organizing come alive. Instead of turning this important part of social work into a dry series of academic abstractions he shows the reader the wonderful and exciting opportunities that exist. He has inspired us to get out there and make change and help build our skills to effectively do so." -Mike Eichler, San Diego State University □ This book provides a holistic vision for macro practice in the early 21st century. It argues very convincingly that effective macro practice requires a strategic vision, grounded in values, that integrates personal and community transformation. Burghardt provides a compass, as well as other tools, that macro practitioners can use to make significant social change. It promises to be a very useful resource for community and organizational practice in a number of fields. □ □ Lorraine Gutierrez, University of Michigan □ Building upon his influential work on the professional and personal dimensions of organizing in *The Other Side of Organizing*, Burghardt articulates an innovative framework for macro practice that is mindful of current and future local, national and global economic, social and political trends. With an emphasis on capacity building from the bottom up, this book offers a challenging, yet practical, approach to justice-centered practice. □ □ Cheryl Hyde, Temple University This book develops a new paradigm suited to the quickly shifting dynamics of a globalized society, both more reliant on social networking, and yet seeking common connection and community. By focusing on how practitioners can make meaningful, strategic choices regardless of their formal roles and responsibilities, the author breathes new life into key issues ranging from how to respond to both diversity and oppression, the vital use of the internet for organizing and the limits to □ virtual trust, □ and co-leadership development. This text is appropriate for upper-level undergraduate and graduate-level students enrolled in courses such as Macro Practice, Community Organizing, Leadership, and Management/Administration in social work and allied departments.

This book explores the enormous diversity in social perspectives on the emergence of nanoscale sciences and technologies. It points to four nodes of interest where nano meets macro: in the making, in the public eye, in the big questions, and in the tough decisions. Each node draws attention to important lines of research and pertinent issues. The book is designed for interdisciplinary teaching, but the richness of issues and perspectives makes it of interest to all researchers, practitioners, and non-academics wanting an introduction to social perspectives on nanoscale sciences and technologies.

NEW YORK TIMES BESTSELLER □ WINNER OF THE PULITZER PRIZE □ NAMED ONE OF TIME'S TEN BEST NONFICTION BOOKS OF THE DECADE □ One of the most acclaimed books of our time, this modern classic □ has set a new standard for reporting on poverty □ (Barbara Ehrenreich, *The New York Times Book Review*). In *Evicted*, Princeton sociologist and MacArthur □ Genius □ Matthew Desmond follows eight families in Milwaukee as they each struggle to keep a roof over their heads. Hailed as □ wrenching and revelatory □ (*The Nation*), □ vivid and unsettling □ (*New York Review of Books*), *Evicted* transforms our understanding of poverty and economic exploitation while providing fresh ideas for solving one of twenty-first-century America's most devastating problems. Its unforgettable scenes of hope and loss remind us of the centrality of home, without which nothing else is possible. NAMED ONE OF THE BEST BOOKS OF THE YEAR BY President Barack Obama □ *The New York Times Book Review* □ *The Boston Globe* □ *The Washington Post* □ NPR □ *Entertainment Weekly* □ *The New Yorker* □ *Bloomberg* □ *Esquire* □ *BuzzFeed* □ *Fortune* □ *San Francisco Chronicle* □ *Milwaukee Journal Sentinel* □ *St. Louis Post-Dispatch* □ *Politico* □ *The Week* □ *Chicago Public Library* □ *BookPage* □ *Kirkus Reviews* □ *Library Journal* □ *Publishers Weekly* □ *Booklist* □ *Shelf Awareness* WINNER OF:

The National Book Critics Circle Award for Nonfiction • The PEN/John Kenneth Galbraith Award for Nonfiction • The Andrew Carnegie Medal for Excellence in Nonfiction • The Hillman Prize for Book Journalism • The PEN/New England Award • The Chicago Tribune Heartland Prize
FINALIST FOR THE LOS ANGELES TIMES BOOK PRIZE AND THE KIRKUS PRIZE • Evicted stands among the very best of the social justice books. • Ann Patchett, author of Bel Canto and Commonwealth • Gripping and moving • tragic, too. • Jesmyn Ward, author of Salvage the Bones • Evicted is that rare work that has something genuinely new to say about poverty. • San Francisco Chronicle

A timely revision in this global age, Human Behavior and the Social Environment, Macro Level develops a sophisticated and original view of the cultural, global, spiritual, and natural worlds that people inhabit, and explores the impact of these worlds on human behavior. An ecosystems/sustainability framework emerges as a key characteristic of contemporary practice. What is sustainable social work? What are the characteristics of a sustainable community? How is the present exploitation of environmental resources unsustainable for future generations? In accordance with the 2015 Council on Social Work Education (CSWE) standards, attention is paid to environmental justice as well as diversity and difference.
