Newly updated, *Agricultural Medicine: Rural Occupational Health, Safety, and Prevention, Second Edition* is a groundbreaking and comprehensive textbook and reference for students and practitioners of public health, and professionals in the field of rural agricultural occupational health and safety. The book introduces specific occupational and environmental health and safety issues faced by agricultural workers and rural residents, and provides a roadmap to establishing sustainable worker and public health support in agricultural communities. Responding to reader demand, *Agricultural Medicine, Second Edition* now features more case studies, key point summaries, and new international perspective chapters comparing North American health and agricultural practices to those in Europe, the Asia Pacific, and South America. Agricultural health and safety engages a multidisciplinary team of medical professionals, veterinarians, safety professionals, engineers, sociologists, epidemiologists, and psychologists, for whom this book serves as an essential resource.

health and safety of farmers, farm workers, and farm residents a leading priority for epidemiologists, occupational health and safety professionals, rural health providers, public health practitioners, and extension agents and educators. Satisfying a growing need for a textbook on this significant aspect of public health, Agricultural Medicine is the first comprehensive textbook and reference for students of public health and health professionals in the field of rural medicine. Agricultural health and safety engages a multidisciplinary team of medical professionals, engineers, sociologists, epidemiologists, and psychologists for whom this book is an overdue yet essential reference. The authors bring a combined 60 years of practice, research, teaching, and scholarship in agricultural medicine to the design and content of this book. Their farm background and ownership add practicality and relevancy to their presentation. An overview of the industry and workforce—agricultural production in the global economy, demographics of the workforce, regulations, statistics, and organizations targeting agricultural health and safety—provides context for the broad but thorough coverage of diseases, infectious and toxic agents, and potential injuries to which agricultural populations are exposed daily.

The agriculture, forestry, and fishing sectors are the cornerstone of industries that produce food, fiber, and biofuel. The National Institute for Occupational Safety and Health (NIOSH) conducts research in order to improve worker safety and health in these sectors. This National Research Council book reviews the NIOSH Agriculture, Forestry, and Fishing Program to evaluate the 1) relevance of its work to improvements in occupational safety and health and 2) the impact of research in reducing workplace illnesses and injuries. The assessment reveals that the program has made

meaningful contributions to improving worker safety and health in these fields. To enhance the relevance and impact of its work and fulfill its mission, the NIOSH Agriculture, Forestry, and Fishing Program should provide national leadership, coordination of research, and activities to transfer findings, technologies, and information into practice. The program will also benefit from establishing strategic goals and implementing a comprehensive surveillance system in order to better identify and track worker populations at risk.

Since the first edition in 1948, Patty's Industrial Hygiene and Toxicology has become a flagship publication for Wiley. During its nearly seven decades in print, it has become a standard reference for the fields of occupational health and toxicology. The volumes on industrial hygiene are cornerstone reference works for not only industrial hygienists but also chemists, engineers, toxicologists, lawyers, and occupational safety personnel. Volume 4 covers environmental and health and safety program management, with a number of new chapters on sustainability, construction health and safety, health and safety of new energies and working with cannabis.
