Set up the signal source to AIR/Antenna. After you set up the signal source, go to Channel Scan or Channel Manage to scan the digital channels. This process usually takes 5-10 minutes to finish. You will be able to see the channel counts during the scan process. 2. Test antenna installation before installing the antenna on the roof

*How to install a TV antenna?
| One For All*

Place your antenna as high as possible. TV signals travel hundreds of kilometers in the air. The higher your antenna, the stronger the signal you will receive. Placing an antenna on the roof of your home or business is the best option.

3. Point the Antenna in the Right Direction. Television signals travel in a straight line from the tower.
