Get Free Blind Equalization

Blind System Identification and Equalization. In early 1990's, we investigated blind system identification and equalization. In order to compensate for channel distortion, channel parameters have to be identified explicitly or implicitly. Blind signal processing estimates

Get Free Blind Equalization

channel/system parameters only by means of statistics of the system outputs without using any training sequences.

Geoffrey Ye Li

The absence of training signals from many kinds of transmission necessitates the widespread use of

Get Free Blind Equalization

blind equalization and
system identification.

There have been
many algorithms
developed for these
purposes, working
with one- or two-
dimensional signals
and with single-input
single-output or..
