The objectives of the First FAO Expert Consultation on Interactions of Pacific Tuna Fisheries included describing the concerns related to interactions of Pacific fisheries directed at tuna and tuna-like species, classifying these interactions, reviewing all available information on them and the methods applied to their study, and making recommendations for future research.

Interactions of Pacific tuna fisheries

Southern bluefin tuna length composition has been sampled routinely in the south-eastern fishery from 1963-64, the sampling taking account of the sorting of fish at sea. Length frequency of the catch, by one cm length class and for each half-month, is available for NSW, SA, Albany and Esperance (Figure 3) (or WA, when these could not be discriminated).

Status of interactions of Pacific tuna fisheries in 1995 ...

This oceanic assemblage includes skipjack, yellowfin and bigeye tuna that are the target of the large industrial tuna fisheries operating in the Pacific countries' EEZs . The results of this study suggest that the proximity to industrial purse-seine fishing may also be an important component for decision makers if the intent is to attract these species.
