Dr. Arthur Getis is a distinguished Professor of Geography Emeritus at San Diego State University. He got his Ph.D. from the University of Washington in 1961. He had been president of several academic societies including the University Consortium for Geographical Information Sciences and Western Regional Science Association.

Helps you convey the nature of the field of geography, its intellectual challenges, and the logical interconnections of its parts. This edition provides students content and scope of the subfields of geography, emphasize its unifying themes, and provide the foundation for further work in their areas of interest.

Fireworks erupt over Rio de Janeiro's Copacabana Beach on December 31, delighting the hundreds of thousands of people who have come to celebrate both the Feast of Iemanja and New Year's Eve. Reflecting Brazil's cultural diversity, this traditional spectacle combines native, African, and Christian beliefs and rituals. Clad in blue and white, the colors of Iemanja, the goddess of all waters, celebrants cast offerings into the water just before midnight, asking Iemanja for her protection and blessing. The oferendas includes flowers, food, candles, and perfume. At the stroke of midnight, fireworks explode overhead, and the throngs sing and dance to celebrate the new year. Book jacket.

Introduction to Geography, 13th edition, by Getis and Getis introduces college students to the breadth and spatial insights of the field of geography. The authors' approach allows the major research traditions of geography to dictate the principal themes. They also include information on current events, such as the earthquake in Haiti. Chapter 1 introduces students to the four organizing traditions that have emerged through the long history of geographical thought and writing: earth science, culture-environment, location, and area analysis. Each of the four parts of this book centers on one of these geographic perspectives.

Applied Geography, A World Perspective reviews progress in applied geography in different regions of the world. It does this through the eyes of an international panel of highly regarded academic practitioners. The book offers new prospects on the use of established approaches and explores exciting new territories. Together, the contributors provide a comprehensive picture of applied geography today. This book is of relevance to faculty and graduate students in the fields of geography, planning, public policy, regional science and other related social and behavioural sciences.

This thirteenth edition of Human Geography retains the organization and structure of its earlier versions. Like them, it seeks to introduce its users to the scope and excitement of geography and its relevance to their daily lives and roles as informed citizens. We recognize that for any students, human geography may be their first or only work in geography and this, their first or only textbook in the discipline. For these students particularly, we seek to convey the richness and breadth of human geography and to give insight into the nature and intellectual challenges of the field of geography itself.

The Handbook is written for academics, researchers, practitioners and advanced graduate students. It has been designed to be read by those new or starting out in the field of spatial analysis as well as by those who are already familiar with the field. The chapters have been written in such a way that readers who are new to the field will gain important overview and insight. At the same time, those readers who are already practitioners in the field will gain through the advanced and/or updated tools and new materials and state-of-the-art developments included. This volume provides an accounting of the diversity of current and emergent approaches, not available elsewhere despite the many excellent journals and te- books that exist. Most of the chapters are original, some few are reprints from the Journal of Geographical Systems, Geographical Analysis, The Review of Regional Studies and Letters of Spatial and Resource Sciences. We let our contributors - velop, from their particular perspective and insights, their own strategies for m- ping the part of terrain for which they were responsible. As the chapters were submitted, we became the first consumers of the project we had initiated. We gained from depth, breadth and distinctiveness of our contributors' insights and, in particular, the presence of links between them.
