Maximo® for Transportation 7.5.1 implements conditional user interface (UI) features in multiple applications. The ability to restrict visibility of a field based on a condition is called "conditional UI." Products that are installed on Tivoli's process automation engine use metadata to control the visibility and use of controls (elements of the user interface) that are used in each product's applications, based on conditions relevant to the use of the control.

Conditional user interface in Maximo for Transportation ...
