concentrates on the deregulation of domestic financial markets and discusses financial liberalisation in terms of its past performance, current progress and future developments. The chapters have been written by expert contributors in the field and focus on topics such as past records of financial liberalisation, future policies of regulation, and current account imbalances. Other papers examine capital account regulations in developing and emerging countries, and capital controls in the Eurozone after the 2007 financial crisis. This collection of papers invites readers to consider the impact of financial liberalisation both during and after the global economic crisis. Scholars and students with an interest in political economy, financialisation, and economic performance will find this collection stimulating and informative.
