~~[PDF] Network security  
—private communication  
in a public —~~

Network security covers  
a variety of computer  
networks, both public  
and private, that are  
used in everyday jobs:  
conducting transactions  
and communications  
among businesses,

# Access Free Network

government agencies  
and individuals.  
Networks can be  
private, such as within a  
company, and others  
which might be open to  
public access.
