UC Software 5.5.0 | May 2016 | 3725-46211-006A USER GUIDE Polycom® VVX Business Media Phones Applies to Polycom VVX 101, 201, 300 Series, 400 Series, 500 Series, 600 Series, and 1500 Business Media Phones,

The scope and importance of International Commercial Arbitration (ICA) has expanded exponentially in the last few decades and has become the natural and logical method to resolve international business and economic disputes. This collective work captures the development of ICA from different perspectives and uniquely brings together the ideas, suggestions and perspectives of in-house counsel as the most important users of ICA, along with outside counsel, arbitrators themselves, and major arbitration organizations who all help provide the service. Most, if not all, of the contributing authors have served as counsel or arbitrator in arbitrations and have further contributed, through their writings, teachings or activities in arbitral and other institutions, to the evolution of ICA covered by this collective work. Accordingly, International Commercial Arbitration Practice: 21st Century Perspectives is an indispensable tool for the reader-practitioner, arbitrator, academic, magistrate or student-not only to obtain useful general information on ICA practice today but to gain insightful views as to the influence of this institution in the settlement of international commercial disputes in specific economic areas, industries and commercial activities. International Commercial Arbitration Practice: 21st Century Perspectives brings the process alive and provides the reader with a useful practice guide whether he or she represents a client participating in an international commercial arbitration, is in-house counsel for a company considering arbitration as a possible method of dispute resolution, or is an arbitrator with cases at hand. The book is organized by Parts which contain thematically related

chapters. Part I deals with an overview of key elements in ICA practice and includes chapters on how arbitration is conducted under different legal systems such as common law, civil law, and shari'a law, as well as a chapter on cultural issues in international arbitration. Part II contains geographical regional overviews covering most regions of the world (Western Europe, Russia/NIS countries, Asia (particularly China & Hong Kong and the Indian Subcontinent), Middle East & North Africa, Latin America, the U.S., Canada, and Australia & New Zealand. Part III includes individual industry sector views of how ICA is conducted in individual industry and business sectors such as oil & gas, LNG, mining, construction, telecommunications, satellite communications, intellectual property, sports, banking & finance, insurance & reinsurance, securities, shipping & maritime, corporate shareholder and bankruptcy settings. These chapters are highly instructive because many of them were written by current or former in-house counsel in these industries or, in some cases, by outside counsel who focus on these industries. Part IV of the book describes recent trends at several major global commercial arbitration institutions such as the ICC, ICDR, LCIA, CPR and WIPO. Part V deals with questions of how technology has been changing ICA practice in recent years, including chapters relating to the use of technology by some major arbitral institutions, videoconferencing in ICA, and online arbitration of internet domain name and e-commerce cases.

For more than 20 years, Network World has been the premier provider of information, intelligence and insight for network and IT executives responsible for the digital nervous systems of large organizations. Readers are responsible for designing, implementing and managing the voice, data and video systems their companies use to support everything from business critical applications to employee collaboration and electronic commerce.

This enriching book describes the value of learning about the development of the human personality through the experience of observing a baby in the context of the family. It is distinctive in the field of infant observation literature, for it shows how the affective learning model augments the learning experience. It also highlights a somewhat neglected area of observational study: the relationship between siblings and its influence on the development of self-esteem of the younger child.

Cisco TelePresence™ Systems (CTS) create live, face-to-face meeting experiences, providing a breakthrough virtual conferencing and collaboration experience that transcends anything previously achievable by videoconferencing. Although the business case for deploying CTS is compelling, implementing it requires advanced knowledge of the latest networking technologies, an attention to detail, and thorough planning. In this book, four leading CTS technical experts cover everything you need to know to successfully design and deploy CTS in your environment. The authors cover every element of a working CTS solution: video, audio, signaling protocols and call processing, LAN and WAN design, multipoint, security, inter-company connectivity, and much more. They deliver start-to-finish coverage of CTS design for superior availability, QoS support, and security in converged networks. They also present the first chapter-length design guide of its kind detailing the room requirements and recommendations for lighting, acoustics, and ambience within various types of TelePresence rooms. Cisco TelePresence Fundamentals is an indispensable resource for all technical professionals tasked with deploying CTS, including netadmins, sysadmins, audio/video specialists, VoIP specialists, and operations staff. This is the only book that: Introduces every component of a complete CTS solution and shows how they work together Walks through connecting CTS in real-world environments Demonstrates how to secure virtual meetings using Cisco firewalls and security protocols Includes a full chapter on effective TelePresence room design Walks through every aspect of SIP call signaling design, including both single-cluster and intercluster examples for use in a TelePresence environment Provides prequalification, room, and network path assessment considerations to help you anticipate and avoid problems Tim Szigeti, CCIE® No. 9794, technical leader within the Cisco® Enterprise Systems Engineering team, is responsible for defining Cisco TelePresence network deployment best practices. He also coauthored the Cisco Press book End-to-End QoS Network Design. Kevin McMenamy, senior manager of technical marketing in the Cisco TelePresence Systems Business Unit, has spent the past nine years at Cisco supporting IP videoconferencing, video telephony, and unified communications. Roland Saville, technical leader for the Cisco Enterprise Systems Engineering team, tests and develops best-practice design guides for Cisco TelePresence enterprise deployments. Alan Glowacki is a Cisco technical marketing engineer responsible for supporting Cisco TelePresence customers and sales teams. Use Cisco TelePresence Systems (CTS) to enhance global teamwork and collaboration, both within your own enterprise and with your customers, partners, and vendors Understand how the various components of the Cisco TelePresence Solution connect and work together Integrate CTS into existing LAN, enterprise, and service provider networks Successfully design and deploy a global TelePresence network Understand the importance of room dimensions, acoustics, lighting, and ambience and how to properly design the physical room environment Provide the high levels of network availability CTS requires Leverage the Cisco quality of service (QoS) tools most relevant to CTS network provisioning and deployment Systematically secure CTS using TLS, dTLS, sRTP, SSH, and Cisco firewalls This book is part of the Cisco Press® Fundamentals Series. Books in this series introduce networking professionals to new networking technologies, covering network
