Portfolio Theory Of Information Retrieval

This is likewise one of the factors by obtaining the soft documents of this **portfolio theory of information retrieval** by online. You might not require more era to spend to go to the ebook opening as well as search for them. In some cases, you likewise get not discover the pronouncement portfolio theory of information retrieval that you are looking for. It will entirely squander the time.

Acces PDF Portfolio Theory Of Information Retrieval

However below, taking into consideration you visit this web page, it will be therefore enormously simple to acquire as competently as download guide portfolio theory of information retrieval

It will not acknowledge many grow old as we explain before. You can pull off it even if pretense something else at home and even in your workplace. hence easy! So, are you question? Just exercise just what we manage to pay for below as without difficulty as evaluation **portfolio theory of information**

Acces PDF Portfolio Theory Of Information Retrieval

Inspired by the Modern Portfolio Theory, an economic theory dealing with investment in financial markets, we argue that ranking under uncertainty is not just about picking individual relevant documents, but about choosing the right combination of relevant documents.

Portfolio Theory in IR (2) Weight w_i is similar to the discount factors that have been applied to IR evaluation in order to penalize late-retrieved relevant documents [Järvelin and Kekäläinen(2002)] It can be easily shown that when $w_1 > w_2 \dots > w_n$, the maximum value of R_n gives the ranking order $r_1 > r_2 \dots > r_n$ This follows immediately that maximizing R - by which the document with highest relevance score is retrieved ?rst,

the document with next highest is retrieved second, etc ...

Portfolio Theory of Information Retrieval

In general, the process of retrieving information consists of two phases. In the first phase, probabilistic retrieval models [1] compute the relevance between a given user's information need (query) and each of the documents in a collection. The second phase focuses on how to rank the calculated documents; the classic Probability Ranking Principle (PRP) [2] forms the theoretical basis of this phase, which ranks the

documents with the order of decreasing probabilities of relevance to ...

Post-Modern Portfolio Theory for Information Retrieval ...

Recently, modern portfolio theory has been applied to modelling the uncertainty and correlation between documents in information retrieval. Given a query, the aim is to maximize the overall relevance of a ranked list of documents and at the same time minimize the overall uncertainty of the ranked list.
