With a new preface by the author. In the tradition of Backlash and The Morning After, and in a political climate where Roe v. Wade is in serious jeopardy, a young activist reveals that the Pro-Life Movement's real agenda is a war on contraception, family planning, and sexual freedom.

Coming to Life does what too few scholarly works have dared to attempt: It takes seriously the philosophical significance of women's lived experience. Every woman, regardless of her own reproductive story, is touched by the beliefs and norms governing discourses about pregnancy, childbirth, and mothering. The volume's contributors engage in sustained reflection on women's experiences and on the beliefs, customs, and political institutions by which they are informed. They think beyond the traditional pro-choice/pro-life dichotomy, speak to the manifold nature of mothering by considering the experiences of adoptive mothers and birthmothers, and upend the belief that childrearing practices must be uniform, despite psychosexual differences in children. Many chapters reveal the radical shortcomings of conventional philosophical wisdom by placing trenchant assumptions about subjectivity, gender, power and virtue in dialogue with women's experience.

In this important study of the abortion controversy in the United States, Kristin Luker examines the issues, people, and beliefs on both sides of the abortion conflict. She draws data from twenty years of public documents and newspaper accounts, as well as over two hundred interviews with both pro-life and pro-choice activists. She argues that moral positions on abortion are intimately tied to views on sexual behavior, the care of children, family life, technology, and the importance of the individual.

"A groundbreaking and illuminating look at the state of abortion access in America and the first long-term study of the consequences—emotional, physical, financial, professional, personal, and psychological—of receiving versus being denied an abortion on women's lives"—

In a country famous for having the most CCTVs in the world, how safe are your rights? Six types of execution are practiced in the industrialized world, torture is openly sanctioned by America, and infringements of people's civil liberties occur daily. Yet in 2005 only 61% of the British voting public chose to stand up for their rights. Explaining what civil liberties are and why they're worth defending, Tom Head shows how you can make a difference.

There are few issues as impactful and consequential for our personal lives and communities as abortion. It divides people not only on the streets and in workplaces, but also in homes and churches. After all, this issue involves personal decisions about sex, pregnancy, parenting, and our health. So while abortion is difficult to talk about, it's important to provide accurate information and a context in which that information can be discussed. In this thoroughly researched and easy-to-read book, author Randy Alcorn examines fifteen major claims of the pro-choice position and shares fact-based, rational responses. If you have mixed feelings about abortion, as many people do, this book can be part of your quest for truth. If you're pro-choice or pro-life, it can help you think through your position. If we have any hope of understanding and engaging with each other, let's move our dialogue beyond bumper stickers, memes, and tweets. Randy encourages readers to listen carefully to arguments on both sides of the abortion debate, and to look at the evidence and weigh it on its own merit.

"A compelling manifesto by the bestselling author of "Heaven "Why Pro-Life?" offers factual answers to the central issues of the abortion debate in a concise, non-abrasive way. Infused with grace and compassion, and grounded in medical science and psychological studies, Randy Alcorn presents a solid case for defending both unborn children and their mothers. Chapters such as, "What Makes a Human Life 'Meaningful,'" "Is Abortion Really a Women's Rights Issue," and "How Can I Help Unborn Babies and Their Mothers" help readers to look at the many sides of this polarizing issue. For those on the fence in the midst of the abortion debate, this book will be a great resource as it clearly and thoroughly examines the pro-life position. For those who are pro-life already, this book is an encouragement to be intelligently and graciously informed.

A masterpiece of reporting on the Supreme Court's most divisive case, Roe v. Wade, and the unknown lives at its heart. Despite her famous pseudonym, no one knows the truth about "Jane Roe," Norma McCorvey (1947–2017), whose unwanted pregnancy in 1970 opened a great fracture in American life. Journalist Joshua Prager spent years with Norma, discovered her personal papers, a previously unseen trove, and witnessed her final moments. With an explosive revelation at the core of the case, he tells her full story for the first time. Prager also traces Roe's fifty-year trajectory through three compelling figures: feminist lawyer Linda Coffee, who filed the original Texas lawsuit yet now lives in obscurity; Curtis Boyd, a former fundamentalist Christian,

today a leading provider of third-trimester abortions; and Mildred Jefferson, the first Black female Harvard Medical School graduate, who became a pro-life leader with great secrets. Essential to our understanding of this key debate, the right to choose or the right to life, The Family Roe will change the way you think about our enduring American divide.

Defending Life is arguably the most comprehensive defense of the pro-life position on abortion - morally, legally, and politically - that has ever been published in an academic monograph. It offers a detailed and critical analysis of Roe v. Wade and Planned Parenthood v. Casey as well as arguments by those who defend a Rawlsian case for abortion-choice, such as J. J. Thomson. The author defends the substance view of persons as the view with the most explanatory power. The substance view entails that the unborn is a subject of moral rights from conception. While defending this view, the author responds to the arguments of thinkers such as Boonin, Dworkin, Stretton, Ford and Brody. He also critiques Thomson's famous violinist argument and its revisions by Boonin and McDonagh. Defending Life includes chapters critiquing arguments found in popular politics and the controversy over cloning and stem cell research.
