QUALITY PROCEDURES

ISO/IEC 17025 enables laboratories to demonstrate that they
operate competently and generate valid results, thereby promoting
confidence in their work both nationally and around the world. It
also helps facilitate cooperation between laboratories and other
bodies by generating wider acceptance of results between countries.

In an ISO 17025 (or other ISO standards) quality system, this structured way of delivering a better service or product is supported by documented information such as procedures, work instructions, policies and forms. The key is to provide all those who must execute the quality system with documented, understandable and workable instructions which define both expectations, responsibilities and actions to achieve the stated quality goals.

ISO/IEC 17025 General requirements for the competence of testing and calibration laboratories is the main ISO standard used by testing and calibration laboratories. In most countries, ISO/IEC 17025 is the standard for which most labs must hold accreditation in order to be deemed technically competent. In many cases, suppliers and regulatory authorities will not accept test or calibration results from a lab that is not accredited. Originally known as ISO/IEC Guide 25, ISO/IEC 17025 was initially
