What makes this case so unique is that the quest for self-sufficiency in terms of water availability in a fast-changing urban context has been crucial to the way development policies and agendas have been planned throughout the years. The authors analyse plans, policies, institutions, laws and regulations, water demand and water supply strategies, water quality and water conservation considerations, partnerships and importance of the media. They assess overall how all these issues have evolved in response to the dynamic needs of the city-state. The study of Singapore shows how a dynamic society can address development without losing its focus on the environment. In the city-state, environmental concerns in general, and water concerns in particular, have played a major role in its transformation from a third world to a first world country. How and why this transformation took place is the main focus of this authoritative book.

When Singapore became a sovereign state in 1965, the fledgling nation faced very similar problems as most other developing countries: high unemployment, low standard of living, and poor environmental conditions. In a scant four decades, it has become the 6th wealthiest country in the world in terms of per capita GDP and has managed its environment so well that it is now considered to be one of the best in the world. In this remarkable book, Tan Yong Soon authoritatively and objectively analyses how the environmental conditions were radically transformed within this period, and the enabling conditions which made this extraordinary transformation possible. This book will unquestionably make all Singaporeans proud of their environmental achievements, and at the same time enable other countries, both developed and developing, to learn many lessons from a most remarkable success story. This book is a must read for any individual interested in environment-development issues. -Prof Asit K. Biswas, President, Third World Centre for Water Management, Mexico and Distinguished Visiting Professor, Lee Kuan Yew School of Public Policy, Singapore.

This open access book highlights Singapore's development into a city in which water and greenery, along with associated environmental, technical, social and political aspects have been harnessed and cultivated into a liveable sustainable way of life. It is also a story about a unique and thoroughgoing approach to large-scale and potentially transferable water sustainability, within largely urbanized circumstances, which can be achieved, along with

complementary roles of environmental conservation, ecology, public open-space management and the greening of buildings, together with infrastructural improvements.

A Brookings Institution Press and the National University of Singapore Press publication This is the story of the Singapore healthcare system: how it works, how it is financed, its history, where it is going, and what lessons it may hold for national health systems around the world. Singapore ranks sixth in the world in healthcare outcomes, yet spends proportionally less on healthcare than any other high-income country. This is the first book to set out a comprehensive system-level description of healthcare in Singapore, with a view to understanding what can be learned from its unique system design and development path. The lessons from Singapore will be of interest to those currently planning the future of healthcare in emerging economies, as well as those engaged in the urgent debates on healthcare in the wealthier countries faced with serious long-term challenges in healthcare financing. Policymakers, legislators, public health officials responsible for healthcare systems planning, finance and operations, as well as those working on healthcare issues in universities and think tanks should understand how the Singapore system works to achieve affordable excellence.

The Singapore Story is the first volume of the memoirs of Lee Kuan Yew, the man who planted the island state of Singapore firmly on the map of the world. It was first published in 1999. In intimate detail, Lee recounts the battles against colonialists, communists and communalists that led to Singapore's independence. With consummate political skill, he countered adversaries, sometimes enlisting their help, at others opposing them, in the single-minded pursuit of Singapore's interests. We read how he led striking unionists against the colonial government, how over tea and golf he fostered ties with key

players in Britain and Malaya, of secret midnight meetings in badly lit rooms, drinking warm Anchor beer with a communist underground leader, of his purposeful forging of an alliance with communists to gain the support of the Chinese-educated masses. Readers will find inspiration in his tenacity as he fought for the people's hearts and minds against first the communists and later the communalists - in parliament, on the streets and through the media. Drawing on unpublished Cabinet papers, archives in Singapore, Britain, Australia, New Zealand and the United States, as well as personal correspondence, he gives us a vivid picture of how others viewed him: determined ("Lee will bluff, bully and blackmail up to the eleventh hour"), motivated ("Choo knew I sweated blood to master Hokkien"), ambitious ("He would think himself as legitimate as I was to be the leader of Malaya"), dangerous ("Crush Lee! Put him inside"). It is a sometimes controversial yet strangely consistent portrait of this Asian statesman. These experiences and his dealings with the political leaders were to shape his views and policies, which have had a major impact on Singapore and the region.

Goh Chok Tong was an improbable Prime Minister for an unlikely country. He had neither the connections nor the cunning to rise to the top, and was even once famously derided by his mentor Lee Kuan Yew for being "wooden" in his communication skills. Except for an imposing height most unusual in this part of the world, he was an ordinary man. He lost his father at a young age, lived in a two-bedroom public flat with his mother and four siblings and needed a government bursary to complete university. Yet somehow he

succeeded. Tall Order tells the extraordinary story of his life and career over half a century, revealing how Singapore's second Prime Minister rose through a combination of strength, wit and a political nous which many, including himself, did not know he had. In this first of two volumes, Goh navigated years of a challenging apprenticeship to Lee, scoring numerous policy successes but also suffering political blows and humiliation. He was the man who first made Neptune Orient Lines, Singapore's national carrier, profitable, before entering politics. The stellar corporate stint was followed by his many novel policies and institutions that have since become household names in the country: Medisave, Total Defence, Residents' Committee and Nominated Member of Parliament. But the highlights were counterposed by setbacks, including overseeing the People's Action Party's first electoral defeat after independence at the Anson by-election. In the hands of acclaimed author and journalist Peh Shing Huei, this authorised biography reveals the private deliberations and negotiations between Goh and Lee before the maiden leadership transfer of independent Singapore. Tall Order is the first biography of Goh. This riveting book offers rare insights into Singapore's biggest and most important political and economic stories.
