“An amazing and brilliant instruction manual on how to find purpose, build a career, and live a life of fulfillment.” – DEEPAK CHOPRA A surefire guide to planning your next career move and discovering the job you really want. Jennifer Turliuk was dissatisfied in her corporate job, so she quit. But she had no idea what to do next. After university, she, like so many graduates, focused on just getting a job rather than figuring out the career she really wanted. Instead of getting another degree or going back to school to change her career path, Turliuk embarked on a “self-education journey,” interviewing and shadowing some of the world’s leading professors, founders, and investors from Silicon Valley companies such as Airbnb, Square, and Kiva. What she discovered was not only a way to find out what she really wanted to do with her own life, but also a career-design process that would help others do just the same. Turliuk’s career-prototyping framework uses tested strategies and exercises, including quantified self, design thinking, and lean methodology to help everyone from recent graduates to mid-career workers looking for a change. Let this book be your guide to finding a satisfying and passion-driven career that is right for you.
